NeurAegis.com

Series A: \$10,000,000
SAFE: \$500,000

NeurAegis, Inc. is a late preclinical stage neuropharmaceutical company pioneering the development of breakthrough treatments for neurological disorders including traumatic brain injury (TBI), concussion, and epilepsy. Our initial focus is developing first-in-class, novel protease inhibitors for TBI where there are currently no FDA approved treatments.

Summary of the Offering

- The first \$500,000 will be issued through a simple agreement for future equity (SAFE)
- SAFE investors will convert at a Series A pre-money valuation cap of \$15 M if the Series A is priced >\$15M
- SAFE investors have full ratchet anti-dilution protection if the Series A is priced <\$15M
- Minimum SAFE investment is \$25,000; investments in increments of \$5,000
- Following the \$500,000 SAFE round, a \$5M - \$10M Series A equity round will be raised with institutional (VC) and/or corporate investors

Summary of Valuation – Capitalization Table

	Common Stock	Preferred Stock	Preferred Share Conversion Price	Valuation
Fully diluted shares outstanding, Pre-\$	20,000,000			\$15,000,000
This Offering (SAFE), assuming conversion at \$15M pre-\$ Series A		666,666	\$0.75	\$500,000
TOTAL after SAFE Offering	20,000,000	666,666	\$0.75	\$15,500,000

Value Propositions & Investment Thesis

Value Propositions

- Enormous addressable market, with an estimated 69 million concussions worldwide each year
 - No current FDA approved therapeutic for concussions—urgent, unmet medical need
 - Novel, first in class protease inhibitors
 - Blood-based biomarker allows tracking of treatment efficacy—a unique feature for treating concussions & TBIs
- Potential to transform patient lives and reduce long term economic burdens*

Investment Thesis

- >10x upside potential based on comparables
 - First institutional round for company with >\$5M of validative, non-dilutive funding from the US DoD
 - 3-5 year exit horizon—planned NASDAQ IPO upon efficacy data
 - Experienced, proven leadership
 - Innovative, proprietary science resulting from decades of cutting-edge research
- Life science venture returns—do well by doing good!*
